General Notice

Re: Employment Opportunity at Caribou Breeding Facility – Jasper National Park

Landmark is reaching out to Indigenous communities which have expressed interest in the Caribou Breeding Facility Project located in Jasper National Park. During the next six months, Landmark will be completing underground utilities, constructing fences and gates, installing animal handling equipment, completing buildings, sidewalks, lighting and site works. This work may be of interest to some of your community members.

Landmark has identified opportunities for general labourers, equipment operators, camp personnel, and construction workers. Landmark pays competitive rates based on skill and experience.

The project site is located 30 km south of Jasper. Out of town employees are housed at our 50 person camp facilities, located within 5km of the project site. Crew transportation from camp to the project site is provided daily.

Individuals interested in working on this project are encouraged to contact the Caribou Breeding Facility Project Manager at mail@landmark-solutions.ca. Candidates should include a brief description of experience, the type of position being applied for, a resume, and contact information.

We look forward to receiving responses from your community.

Thank you,

Lorne McNeilly, RPF
Construction Manager
